Hello Lisa,

It was privilege to have Denis present to our students. His two year journey, IN THE FOOTSTEPS OF MARCO POLO, was brought to life in the manner with which it was presented. His humility and caring attitude was evident through his unique demeanor with our students in the way he presented the documentary of his journey. Our students were excited and engaged throughout the presentation, and had some great questions for Denis during the question and answer session. Overall, it was a valuable learning experience for our students as they listened to Denis as he brought his own life experiences on the cultures, religion, and relationships that he lived during his awesome journey from Venice to China and back.

Sincerely,

Bobby Cordova
Vice-Principal
Abuquerque Institute for Math and Science at UNM
